

Centramax® Quick-lock Stop Collar

The CentraMax® Quick-Lock Stop Collar is Antelope's newest fast and simple installation stop collar for the CentraMax® CT Centralizer Series.

The CentraMax® Quick-Lock Stop Collar eliminates the need to ship casing to installation locations. The quick and simple installation method is robust in its performance. Utilized with any CentraMax® CT Series Centralizer, the stop collar provides high holding force, holding forces up to 150,000 lbs. To activate the quick-lock ring, slide the stop device on to the casing with the centralizer and remove shipping screws once the desired location of the stop is reached.

FEATURES:

- Locking mechanism remains fully contained under all conditions
- Minimalist design - only 2 working parts for Uni-Directional and 3 parts for Bi-Directional versions
- Fully Installed by the simple removal of shipping screws
- Non-welded carbon steel alloy construction
- Variable wedge energizing mechanism grip increases in direct response to applied load
 - Higher performance than other slip-on collars
 - Standard 'QG' axial load rating is 100,000 lbs
 - Slim line 'QGS' axial load rating is 65,000 lbs
 - Passed an extensive qualification program

BENEFITS:

- Easy to install / minimal training required
- Quick to install / saves time & expense
- No special setting tools required
- Safety: Eliminates hand safety hazard during installation
- Robust locking mechanism assures functionality when most needed (during critical loads events)
