

# LEAVE NO METAL BEHIND

## CUSTOMER CHALLENGE

A major operator in the Marcellus Shale in Pennsylvania was in need of a reliable and cost-effective frac plug solution to install in the longest drilled Marcellus lateral in the state of Pennsylvania. The operator's major concern was the lack of ability to get coil or stick pipe to TD of 27,009' resulting in the concession of 5,000'+ of productive pay zone.

## THE SOLUTION

Innovex recommended the Bubba Dissolvable Frac Plug for the job. The Bubba Frac Plug utilizes industry leading dissolvable technology to provide a dependable, cost-effective dissolving frac plug that leaves no metal to be cleaned out of the well bore post frac.

## REAL RESULTS

Utilizing the Bubba Dissolvable Frac Plug in the first 28 stages of the frac eliminated the need to drill composite plugs out of 5,000' of wellbore. The Bubba plug held every frac stage and zero plugs were tagged during clean out. The luxury of cleaning out only frac sand with no plug parts in the wellbore results in an easy lateral cleanout and valuable time savings for operators.

## GENERAL INFO

- 5-1/2" 20# Casing
- BHT: 160
- TVD: 7,000'
